47. Potential Enhancement of Research Unit in Bio-psychosocial and Behavioral Science. Supported Budget During March 2017 – February 2018 by Srinakharinwirot University.
48. Project for Data Collecting and Analysis of Health Literacy to Reduce Health Risk Behaviors of Thai Teenagers. Supported Budget During December 2018 – March 2019 By Department of Health Service Support, Ministry of Public Health.
49. Project for Data Collecting, Analysis and Reporting of Organizing Result for assessing the Environmental Health Literacy for the Home-Bound and Bed-Bound Elders of Village Health Volunteers in Urban and Rural Area. Supported Budget During October 2018 – April 2019 by Bureau of Environmental Health, Department of Health.
50. Project for Monitoring and Evaluation of Human Resource Development Programs in the Humanities and Social Sciences (Outstanding GPA Scholarship, Humanities and Social Sciences of Thailand) Supported Budget During October 2018 – June 2019 by Office of Student Promotion and Development , Office of the Higher Education Commission.

51. Environmental Health Literacy Scale and Causal Model of Management Behavior among Community Health Volunteers in urban and rural communities. Supported Budget during October 2018 – April 2019 by Bureau of Environmental Health, Department of Health, Ministry of Public Health
52. Assessing and Improving Health Literacy and Wellbeing in Thai families at risk of NCDs: The Development of a Culturally Relevant Health Behavior Model and a Positive Psychology and Health Literacy Program. Supported Budget in October 1, 2017 – September 30, 2019. by British Academy for the humanities and social science, Advance Scholarship, Newton fund and TRF
53. Effect of environmental health literacy situation on preventing the impact of PM_{2.5} dust of the village health volunteers in the eco-industrial cities. Supported Budget in December 2019 – May 2020 by Health Impact Assessment Division, Department of Health, Ministry of Public Health.
54. Report of data collecting and analysis results by teacher focus group. “Multicountry study on the role of teachers in ensuring safe and non-violent learning environments” in March - July 2020 funding by UNESCO.
55. Development of oral health school for decrease oral health disease of school age child and family: community action research. Supported Budget in August 2020 – July 2021 by National Research Council of Thailand
56. Assessing and Improving Health Literacy and Wellbeing in Thai families at risk of NCDs: The Development of a Culturally Relevant Health Behavior Model and a Positive Psychology and Health Literacy Program during October 2017 – November 30, 2019. (British Academy for the humanities and social science, Advance Scholarship), Newton fund and TRF
57. Creating the situations report of environmental health literacy on preventing the health impacts from dust particulate matter of less than 2.5 micrometers (PM_{2.5}) of village health volunteers in ecological industrial urban areas. Supported Budget in December 2019 – May 2020, funding by Department of Health, Ministry of Public Health.
58. Reporting on the results of data collection by teacher group discussion on “Multicountry study on the role of teachers in ensuring safe and non-violent learning environments” in March – July 2020, funding by UNESCO
59. A Meta-Analysis of Positive Psychology Interventions in Patients with Non-communicable Diseases. In March – September 2020, funding by Thailand Research Fund.
60. A Systematic Review Protocol of Health Literate Organization (Factory). In March - September 2020, funding by Thai Health Literacy Promotion Association - THLA
61. Talent Management and Talent Retention in Family Business Project: Case study Seafood Processing Industry in Southern Thailand. In April 2017 – September 2020, funding by Thailand Research Fund.
62. Development of Oral Health Literate School for Decreasing Oral health Disease of School Age Children and Family: Community Action Research. In September 2020 – August 2021, funding by National Research Council of Thailand.
63. The development of assessment scale and study situation of environmental health literacy on pig farms management with the public health legal by community participation. In April – September 2021, funding by Department of Health, Ministry of Public Health.
64. Health Literacy in Dietary Supplement Use among Working-Age Group: Meta-Analysis and Causal Model. In May 2022 – April 2022, funding by BSRI, Srinakharinwirot University

11.2 Ongoing research

1. Research and development of a digital self- assessment scale for health literacy and sufficient health behavior and implement of the curriculum to improve health literacy on decrement of non-communicable diseases (NCDs) in working age risks group. In July 2021- July 2024, funding by National Research Council of Thailand.
2. Artificial Intelligence through a contextual game-based learning approach to cultivating digital citizenship behaviors. In November 2021 – October 2024, Flagship Project funding by Thailand Science Research and Innovation (TSRI)

12 . Teaching Experience for Graduate Student

- RB 722 Leader, Member, and Organization Development
- RB 591 Right Think
- RB 581 Socialization and Human Development
- RB 791 Project Management
- RB 884 Seminar in Behavior Social Science
- RB 734 Emotional Intelligence and Work Quality
- RB 803 Research Practicum
- RB 781 Work Socialization
- AP 632 Health Psychology in Working
